Wordpress Introduction

Course Tutor:

HAMISH BROWN

Course Content:

Wordpress is the world's most popular web publishing platform, powering over 30% of all websites. It's open source, free to download, includes thousands of free themes and plugins and has an active community of users.

This 1-day course offers an introduction to this powerful and versatile technology and covers everything from the basics upwards, aiming to provide attendees with the knowledge and skills to customise and manage their own Wordpress website, and in the process, update their digital skills for the modern workplace.

No prior knowledge necessary. Content covered includes:

- HTML
- Content management
- Images
- Themes
- Plugins
- Hosting and additional costs

This is a Zoom class, with breaks during the day to work on a practical activity. Attendees must have a webcam-equipped computer capable of running Zoom, a set of headphones, basic computer/web literacy and ideally some pre-prepared text/images with which to make a sample website.
