

Filming & Photography with drones for beginners

Course outline

Course Tutor: Andy Crabb

DURATION: 2 hours via Zoom

Course Content:

Press photographers have seen their incomes drop dramatically and need ways to diversify and expand their employment opportunities. This course opens up possibilities for both media and commercial photography. It is not simply about the manual operation of drones, but the application of them for press photographers.

The course will cover a basic introduction to the use of drones in film and photography.

Participants will learn:

- Available models and costs
- Legal requirements in the use of drones
- Basic techniques of operation
- Industry uses of drones and the ways in which they can be used to expand professional options
